Projects

Personal Project

HighTechZone Website — Live Project

- Designed and built a multi-section website with AI guides, blog, free templates, FAQ and newsletter sign-up.
- Built JavaScript tools: AI Prompt Builder & Password Checker.

Personal Project

Portfolio Website — Live Project

- Designed a clean, responsive portfolio that presents my skills, services and web design projects to clients.
- Managed with Git and deployed live on GitHub Pages.

Final Year Project

House Bidding System — 2020

- Built a user-friendly online auction website where users list properties and buyers place bids easily.
- Buyers can bid locally or from anywhere in the world.
